

Aimee Ramirez

Rhode Island | aimeelramirez@outlook.com | 401-636-5003

Summary

A devoted, capable, and adaptable Software Engineer with a Bachelor of Science in Technology (Web Design Patterns and Development) and over five years of programming experience. Proficient in a wide range of technologies, software development, system analysis, and project management. Currently contributing to the field of AI and Large Language Models (LLMs), with expertise in designing software solutions, system validation, and AI-driven evaluations. Eager to continue solving complex technical challenges and advancing innovations.

Work Experience

Outlier.ai - Software Engineer (AI Role), Providence, RI - November 2024 - Present

Assisting in the training of Large Language Models (LLMs) for Outlier's clients, with a focus on integrating software engineering expertise into AI development.

Evaluating LLM responses to ensure precision, quality, and applicability for client-specific needs.

Designing and generating prompts to enhance training and alignment of LLMs with project goals.

Leveraging technical and programming skills to refine AI-driven solutions, contributing to the advancement of AI technologies.

US Naval Undersea Warfare Center/DOD - IT Specialist (APPSW), Newport, RI - February 2024 - May 2024 (Probationary Period)

Developed and maintained application software to support mission-critical operations, ensuring high performance and reliability.

Conducted system analysis and designed solutions tailored to business and operational requirements.

Provided advanced technical support, resolving complex issues and minimizing downtime.

Successfully completed projects within tight deadlines, adhering to budgetary constraints.
